Why Security Policy Tool fonts appear very tiny on my laptop [High Resolution(4k) devices / Surface]?

Solution: Right click on the Security Policy Tool icon on desktop and click "Properties" to load properties window and click on "Compatibility" tab. Then Click "Override high DPI scaling behavior" Checkbox. And select "System" from the "Scaling performed by" dropdown menu. Finally Click "OK" to close the window and run Security Policy Tool executable to enjoy the software.

	Security Policy Tool Properties X
	Security Details Previous Versions
Open	General Shortcut 1 Compatibility
Open file location	If this program isn't working correctly on this version of Windows, try running the compatibility troubleshooter.
👎 Run as administrator	Run compatibility troubleshooter
Troubleshoot compatibility	How do I choose compatibility settings manually?
Pin to Start	Compatibility mode
Scan with Windows Defender	Run this program in compatibility mode for:
Pin to taskbar	Windows 8 \vee
Restore previous versions	Settings
Send to >	Reduced color mode 8-bit (256) color
Cut	Run in 640 x 480 screen resolution
Сору	2 Override high DPI scaling behavior. Scaling performed by:
Create shortcut	System ~
Delete	Application 3 System
Rename	System (Enhanced)
Properties	Change settings for all users
	4 OK Cancel Apply
